DETAILED ACTION

Reason For Allowance

1 Claims 1, 3-16, 18-34 and 36-45 are allowed.

2 Following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claim(s), in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 1, 16, 31 and 34, which include an extension plate defines a first gap between the extension plate and the mirror plate; and the extension plate is connected to the mirror plate via a post.

3 Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Huibers et al. (US Patent 6529310 B1) discloses a deflectable spatial light modulator having superimposed hinge and deflectable element in Figure 11 comprising of a deflectable micro-mirror structure (1100) in accordance with yet another embodiment of the present invention, a mirror plate (1120) of micro-mirror structure (1100) is suspended above, and

deflectably coupled to, optically transmissive substrate (1110) by means of a mirror support structure (1130); however, Huibers et al. does not teach or suggest wherein an extension plate defines a first gap between the extension plate and the mirror plate; and the extension plate is connected to the mirror plate via a post.
